Web Page :

The Spring 2003 NSF/CEME Conference on General Equilibrium Theory will be held May 23-25, 2002 at Washington University in St. Louis. The program committee is Gaetano Antinolfi, Kerry Back, Glenn McDonald, Wilhelm Neufeind, Jeroen Swinkels, and John Nachbar (Chair). Although GE is the organizing theme of the conference, we are interested in good theory papers in all areas. We are particularly interested in papers on the micro foundations of markets and price formation (papers on asymptotic efficiency in auctions would, for example, fit under this heading). Sessions will begin on Friday afternoon, May 23th, and continue through Sunday morning, May 25. The Conference will be held on the campus of Washington University. If you are interested in presenting at the conference, please send a hardcopy of your paper to John Nachbar (address below) or, preferably, send a PDF file via email to Karen Rensing at karernr@wueconc.wustl.edu or to John Nachbar at Nachbar@wueconc.wustl.edu. Long abstracts are also acceptable. Submissions must be received by January 31, 2003. We expect to be able to provide funding for travel and hotel expenses of speakers. Please pass news of this conference on to other potentially interested parties. We welcome recommendations of papers to consider, especially from younger scholars. All organizational details including accommodation and travel information will be posted on a website at a later date.
