The overall aim of CIRET conferences is to encourage and improve communication, exchange and co-operation between academics and practitioners who conduct economic surveys, analyse survey data and develop or make use of cyclical indicators. CIRET, the Centre for International Research on Economic Tendency Surveys, is also a forum for discussion and application of new methodological developments and their results. This call invites papers related to a broad range of topics to be investigated based on several types of surveys (business tendency surveys, consumer surveys, investment and innovation surveys, etc.) or based on the development and use of cyclical indicators, including methodological aspects. Within this framework, all types of contributions are welcome.
